Abstract - The objectives of this research are to study 1) examine the key factors in the policy chemical pesticides to treat units, 2) the problems of Education Policy chemical pesticides to treat the achievement of results and the extent to Thailand. And to develop policies chemical pesticides to treat the achievement better to do units, 3) to survey the opinions of chemical pesticides. It is caused by a chemical pesticide policy into practice units, by such a qualitative method, the data have been collected by in depth interviews on staff competency development with 9 key informants, purposively selected from 3 groups of organizations and activities that support the policy implementation. The achievement of policy levels staffs, and Persons who know about staff competency. The result reveals that according to the state with the "consent" is social, economic and political factors, followed by the factors of policy objectives and standards.

Keywords - The Achievements, Objective, Expertise, Results Based Management, Impact, Outcome

I. INTRODUCTION

2 decades Countries affected by the use of chemical pesticides resulted. Farmers and their families have been directly Moreover pesticide toxic chemical pesticide residues in the food chain and the environment that enter the body through eating. And inhalation exposure Effect on health in both the short and long term. A survey in the US found that the effects of exposure to pesticide residues made public. Illnesses and diseases such as cancer, anemia, a genetic disease. And many other diseases

Data from the study showed that the overall picture. The use of chemical pesticides is increasing rapidly. Due to the restructuring of manufacturing plants with low value-added crops such as corn, is a high value, such as vegetables, fruits, which grow such crops. The need for chemical pesticides in quantities higher than the original. Second, include Situation chemical pesticides by farmers in the higher threshold. Due to the expansion of agricultural areas. Finally, Conditions of the competition of chemical pesticides violence. The real price decline over the last decade. These three are all influence the decisions of Agriculture to increase the use of chemical pesticides.

II. RESEARCH OBJECTIVES

1. To study the key factors in the policy chemical pesticides to treat.
2. To study the Pesticide Policy Implementation.
3. To study the opinions of staff to use pesticide and personnel of the agencies.

III. RESEARCH RESULTS

The study showed that The key factors affecting the policy chemical pesticides to achieve compliance with the "consent" is social, economic and political factors, followed by the factors of policy objectives and standards. And the side with the lowest average. Is the communication between organizations and activities that support the policy implementation. The achievement of policy levels. "Quite a lot of success" is the surveillance and monitoring of the effects of chemical pesticides, followed by the approval to import. The use of chemical pesticides and

the average minimum is preparing measures to cope with emergency situations and maintain the use of chemical pesticides. The results on the attitudes, opinions, promote not use chemical pesticides in the "agree" is the use of chemical pesticides, hoping yield more shortly, followed by substance users. Pesticide use chemical pesticides to help them work more comfortably and with an average minimum the use of chemical pesticides on the use of chemical pesticides and reduce the time and labor to a minimum. Quality products are chemical pesticides. The attitude of the packaging that is easy to buy chemical pesticides in chemical distribution. Agree minor Packaging chemical pesticides as a giveaway. Spraying line And with an average minimum. Packaging, chemical pesticides are durable. Easy to use Benefits of using chemical pesticides on the job. The level is agreed Do not use chemical pesticides do not accumulate in crops was minor, not using chemical pesticides, no residues and with an average minimum. Do not use chemical pesticides, the soil does not deteriorate. The quality of a state agency that provides any knowledge of not using chemical pesticides. In agree Is an agency of the state of knowledge about the use of chemical pesticides thoroughly. The second is the government agency recommends the use of chemical pesticides properly. And the average minimum Government agencies involved in the surveillance. Careful planning and getting on with emergency situations. The trust in public authorities. Somewhat agree, is a center or agency complaint. The second is the government agency involved with the politician. And the average minimum government agencies are facilitating matters like. Contact with Government Agencies Efficiency of Agricultural Technology Attitude is somewhat agree State agencies have invented agriculture are always new. The second was farming tools and equipment are critical in today's lowest average new agricultural technology is still not meet the demand for quality output. Feedback 1) Environment. Because there are pesticide residues in the environment. Such as rivers, canals Local and agricultural products

Government policies need to be prepared to provide insights about academic valid. The use of chemical pesticides. Government agencies must be coordinated to complete the development works published by academic promotion is valid, 2) the quality of life. To control the quality and safety of consumers, both domestic and abroad, to gain confidence. Enhances the value of exports and reduce the bounce of foreign goods. In addition to reducing the use of chemical pesticides. The bodily harm Should promote the use of natural extracts. Reduce pests The balance in the ecosystem, and 3) social, economic and political development must be "sustainable agriculture" is the development of alternative agriculture. The content is similar Thailand's traditional agricultural society Prior to the economic and social plan. The system is not a matter of production. Only But a holistic view Regardless of Natural Resources Local Environment Promote both agriculture and consumers have a better quality life and still have an economic return.

IV. RESULT DISCUSSION

On unit's staff competency issue, the overall competency is at medium to high rating. First results of a survey on the factors that affect The results of the survey on the factors that affect policy chemical pesticides to practice to be successful overall, officers and employees have a comment quite agree on the factors that will affect policy. implements The focus on the social, economic and political factors. This is probably because the agricultural chemical pesticides became a major factor influencing the behavior of chemical pesticides. It was also quite agree with many other factors, respectively is the objective of the policy and standards .Factors understanding and intention of the operation or collaboration to fulfill the leader's policy towards the practice. The representative nature or organization that led to the execution policy. Factors resources Related Agencies To support policy implementation to be successful. And the communication between organizations and activities that support the policy implementation.

Considering the comments from focus groups and key informant on various factors in the policy into practice, it was found that.

The policy objectives and standards of chemical pesticides. Overall servants Employees, servants and employees The opinions are quite agree. Most standard policies that chemical pesticides can be done. Understand and realize the objectives and standards for the implementation of the standards. Good policy is clearly stated performance standards and comprehensive understanding easier. Facilitate policy implementation. Taking into account the interest of the people [1]. The resources of agencies that support the implementation of policies to be successful. Overall servants Employees, servants and employees are the opinions quite agree. This is because The agency has sufficient supplies equipment for use in practical applications. Adopting modern technology and management techniques used by the administration a good resource management. The agencies succeed in the workplace. The key informants that. Ministry of Agriculture and Cooperatives Revenue from the budget down sufficiently. The development of personnel and resources to civil servants, employees and potential employees are eager to focus on the development of enterprise knowledge is essential to the development of integrated enterprise [2]. Communication between organizations and activities that support the policy implementation to achieve real power. Overall, the reviews are quite agree. Most of that communication activities are planned to suggest policy operations, adequate chemical pesticides. Discussion is closed Or a notice to the agency staff are aware of policies or issues always timely The senior management was informed of the details of the policy decisions that have gone in every time a new policy. Also included are links to official and unofficial communications of. Agencies and others involved in the process of policy implementation. The key informants that the share structure, authority office, clearly separated from the action plan [3].

Characteristics agency or organization to take policy action as a whole. The opinions are quite agree. Perhaps that Front running is an important part of the organization. And the head of the agency, which is well acquainted with all of these departments in the organization if it cannot manage it. And departments within the organization can talk freely and extremely friendly. Streamlined management and organizational flexibility over [4]. The understanding and intention of the operator or cooperate in its response. Policy leaders meet to practice. Overall, the reviews are quite agree. This is probably because I have been training to be skilled in more jobs. And that as a developing human links continue to be made to enhance capacity of the organization to drive enterprise performance and to put policy into practice [5]. Problem on personal trait of individual staff affects the competency progress on Task Achievement Motive, Expertise, and Changing Plan. This corresponds to the research of Panupong Suwannus which stated that personnel who are narrow-minded, believing that their current skill and experience is already enough to perform their tasks, are likely to be lack of vision to improve themselves by seeking out new body of knowledge [6]. The socio-economic and political support for effective policy implementation. Overall, the development must "Sustainable agriculture "The development of Alternative Agriculture. The content is similar Thailand's traditional agricultural society Prior to the economic and social plan. The system is not a matter of production. Only But a holistic view Regardless of Natural Resources Local Environment Promote both agriculture and consumers have a better quality life and still have an economic return.

The results from the attitude of farmers who use chemical pesticides to promote one side does not use chemical pesticides 2. Quality Chemicals, pesticides, 3. the benefits of not using chemical pesticides. 4. Quality of the work of state agencies that provide news. Knowledge does not use chemical pesticides 5. Trust in government agencies 6. Performance of Agricultural Technology 6. The trust in

public authorities. The impact of public policy on chemical pesticides to include one environmental practice. 2 and 3 the quality of life and agricultural residues. The attitude of farmers who use chemical pesticides contain one of support, not using chemical pesticides 2. Quality Chemicals, pesticides, 3. the benefits of not using chemical pesticides in. 4. Quality of work of state agencies that provide news. Knowledge does not use chemical pesticides 5. Trust in government agencies 6. Performance of Agricultural Technology . The trust in public authorities.

V. SUGGESTIONS

At policy level, environment Because there are pesticide residues in the environment. Such as rivers, canals Local and agricultural products Government policies need to be prepared to provide insights about academic valid. The use of chemical pesticides. Government agencies must be coordinated to complete the development of academic publishing by promoting the correct principles. Quality of life To control the quality and safety of consumers, both domestic and abroad, to gain confidence. Enhances the value of exports and reduce the bounce of foreign goods. In addition to reducing the use of chemical pesticides. The bodily harm Should promote the use of natural extracts. Reduce pests The balance in the ecosystem. Economic, political and social development requires sustainable agriculture

Suggestions for research in the next research. Achievement of chemical pesticides to treat. In this study, researchers from. The Ministry of Agriculture should primarily be in the framework of this research to other organizations involved in the matter. Chemicals in Thailand To confirm the validity of the concept developed.
